2017

PROJECTS

- **Embracing Simulacrum :** HTML5 | CSS3 | JS (ES6) | Django
It is an auction based web-app which focuses on improving the scope of artists and artisans all over the globe. It promotes local handicrafts where vendors can list their product and place a bid for user to counter on.
- **MoodVoke:** HTML5 | CSS3 | JavaScript (ES6) | NodeJs
The app helps user in keeping a track of good mental health by analyzing your day-to-day mood. The app specifically provides an edge and lends out a helping hand to the LGBTQIA+ community.
- **Beaches and Blues :** HTML | CSS3 | JS
This website is made to raise awareness among people regarding the cleanliness of the environment particularly beaches. This website keeps track of user's activities through the media you upload. The user's earn some points each time they make a post on their respective accounts. These points are later translated into rewards. These rewards are either vouchers which they can be used while shopping on online platforms or these can also be translated as discount coupons on their tariff during their next stay.
- **General Open Source Tasks:** JavaScript | HTML | CSS | C | C++
This projects regular work done to learn front end development in order to maintain consistency.

ACHIEVEMENTS

- Secured **Global Rank 171** in Codechef February Long Challenge 2022 out of 16755 (**top 1%**).
- Secured **Global Rank 12660** in Codekaze'22 among 2,00,000+ global participants(**top 6%**).
